Also, Skyline's grocery chili (canned and frozen) is gluten free.

With this said, we are not able to tell you with complete certainty that products in a restaurant setting would not be exposed to products which contain gluten. We are not sure any restaurant can guarantee this.

We are very sensitive to consumers with food allergies and would hope you can dine at our restaurant. However, we cannot honestly tell you there is no chance for products containing gluten to come in contact with those that do not.
